Subject: RE: Draft Area 5 Tree Removal Gamma Survey and Sampling Trip Report

Thanks Chad. I am waiting to hear back from Lyndsey on a few things for the tree report.

The HTC and 738 UMR reports....refresh my memory on where we are with those data tables?

Question...where have we stored the soil/slag sample containers from GNBC Office and Area 5? I want to keep specific samples that contain slag from the excavated areas. I have that cross section/asphalt "crown" from the office. But I also want to make sure we have examples of the higher concentrated material sample jars to archive for potential fingerprinting reasons in the future.

Thanks
